*** What types of behavioral health professionals are included in the Behavioral Health FFS Network?**

We have different types of providers in our network that provide a variety of services to meet your behavioral health needs. A description of the types of providers and the services they provide are listed below.

- **Masters Level Clinician:** Masters Level Clinicians have Master’s degree in one of the following mental health disciplines: Social Work, Professional Counseling, Marriage and Family Therapy, Psychology, or Nursing. These individuals are independently licensed in the state in which they practice. They are commonly known as LCSW’s, LMFTs, or LPCCs. They provide various services including assessment, diagnosis, and therapy for behavioral health conditions. In some cases, they may recommend that you consult with a psychiatrist, primary care physician or nurse practitioner to evaluate whether medication could contribute to achieving the best outcome.
- **Psychologist:** Psychologists generally have doctoral degrees in the area of educational, child, clinical or counseling psychology. Psychologists are independent practitioners licensed in the state in which they practice. They are commonly known as Psy.D or Ph.Ds. They provide a variety of services including assessments, psychological testing for diagnostic purposes, and most offer therapy services for behavioral health conditions.
- **Psychiatrist (Physician):** Psychiatrists are Medical Doctors that specialize in psychiatry. They are licensed in the state in which they practice and most are Board Certified in their specialty. They are commonly known as M.D.s or D.O.s. Most often they conduct a thorough evaluation and may prescribe medications, then monitor the effects of the medications. Some psychiatrists also conduct therapy. Some psychiatrists have sub-specialties in the area of child psychiatry, adolescent psychiatry, addictions or geriatrics. If you are interested in a psychiatrist who has a specialty be sure to inquire as to whether or not they have been trained in that specialty.
- **Psychiatric Nurse Practitioner (PNP):** PNPs also called Mental Health Nurse Practitioners have master’s or doctoral degrees in psychiatric-mental health nursing. These individuals are independent practitioners licensed in the state in which they practice. They can provide services similar to a psychiatrist including assessments, diagnosis, and may provide treatment through medication management and therapeutic interventions.

*** What is meant by timely access to care?**

Beneficiaries have the right to appointments within the following time frames: Urgent – 48 hours; Routine (Non-Urgent) – 10 business days for non-psychiatrist; 15 business days for psychiatrist. The wait time for a routine appointment may be longer if the provider has determined and documented that a longer time period will not negatively impact the beneficiary's health. Interpreter services are available to beneficiaries at the time of the appointment as requested. If you need assistance with a timely referral to an appropriate provider, please contact the Access in Crisis Line at (888) 724-7240.
