Level of Care Determination Instructions

After completing the screening (and determining the risk ratings) in each of the six dimensions, review the "Levels of Care" document which describes the typical risk ratings associated with each level of care and can help guide your level of care recommendation.

Once the recommended level of care is determined, document it in the space below. Also document the level of care to be provided. If there is a discrepancy between the two, document the reason(s) for the discrepancy in the spaces provided.

If the screening results indicate a level of care different than the one your program provides, complete the "Designated Treatment Provider Name/Location" field with the information from the program you will be linking the client to.

DMC-ODS regulations require that a "Licensed Practitioner of the Healing Arts" (LPHA) make level of care determinations. In the event an LPHA does not conduct the screening (and an AOD/SUD Counselor does), the Counselor and LPHA must have a face-to-face review of the information, and the LPHA must co-sign the form, indicating their agreement with the level of care determination.*
