### Consumer Center for Health Education and Advocacy

Most Medi-Cal beneficiaries must enroll in a Medi-Cal Managed Care Plan. The health plans have a responsibility to make sure their members receive necessary health care. The benefit of being on a Medi-Cal Managed Care Plan is easier access to health care, including specialists. Although some benefits are covered by other program entities, such as the San Diego Regional Center, County Behavioral Health Services, California Children's Services and Denti-Cal, the health plans are responsible to ensure treatment is well coordinated.

If there is a problem getting necessary care, members and providers should first contact their health plan's customer service department. In most cases, the health plan will resolve the issues. Occasionally, a plan member may feel his/her needs are not being met and may need a third party to help break down the barrier. The Consumer Center can help. They work closely with the health plans to help figure out where the barrier is and how to resolve the problem.

The Consurmer Center for Health Education and Advocacy phone number is: 1-887-734-3258.
